Dear Lil,

1/7/74

These days I file all reading matter for when I'm waiting for Lil or have other odd moments. Thus with the enclosures with your mailing of 1/3. You mention a friend, formerly CIA and his beliefs, it "has important files" and "believes CD931 was sanitized." About the first, please ask him if this is just belief, which I would share on belief alone, if or if he knows something. On the second, he is absolutely right. Not only in general, where I have a number of files, but I'm pretty sure in this case. They provided an entirely different version for publication. I think I have the correspondence. So, we do know the practise. We do not know the real content of the documents before they were rewritten. Please ask him if he has any knowledge of domestic activities. What part was he in, in what role? Analyst? Spook? Radio operator? Guard? Thanks and best.

I've drafted a piece on my relationship with Russell. Wish I knew who would use it!

I'm writing someletters. Thanks and best,
